

The training for Young leaders

Each team, club or working group needs new members or "new blood". Therefore, on 26 April 2013, the young leaders training was organized for new students interested in working in our school club. The lecturer was Ms. Ľubica Bošanská and 6 students from the grammar school Varšavská in Žilina also participated on the training. We plan to cooperate with this school in the future. The training began with get-to-know-you games and continued with activities to develop leadership and organizational skills. Students became familiar with the various positions in the team and their meaning.

The training was completed by collecting students' ideas and suggestions for changes and improvements at school. Responses we have got so far are very positive and we hope that students will follow the enthusiasm they had on the training :-)
